

MARINER III ALFALFA

- Branch rooting system
- Adapted to variable soil conditions
- Stands up to wheel traffic pressure
- High yield potential
- Fast recovery after cutting
- Superior winterhardiness and persistence

Mariner III alfalfa is designed for 3 to 4 cut management systems where variable soil conditions are a concern. Mariner III excels on both wet and well drained soils, plus resists heaving and mechanical injury better than other alfalfas. With the potential for high yields especially under less than ideal soil conditions, great forage quality and an excellent disease and insect resistance package, Mariner III gives you the flexibility to optimize your management decisions.
