

Partner Perennial Ryegrass

This new turfgrass exhibits excellent turf quality, and is among the darkest green turfgrasses available. Partner quickly develops a dense turf that is less prone to weed establishment. Leaf texture is very fine.

Partner Turf Type Perennial Ryegrass was tested at Lewisburg, PA, Providence Forge, VA and Forest Grove, OR and is well adapted for use wherever ryegrass is grown. Use Partner alone or in blends and mixes wherever fine turfgrass is required. Seed will be available in the Fall of 2002.
