

# DESIRE

- Dark green color
- Fine leaf blade
- Improved disease resistance
- Excellent drought tolerance
- Improved heat tolerance

Desire has a superior dark green color that was among the darkest green new varieties in the most recent NTEP.

In addition, Desire has a very fine leaf texture, and excellent disease resistance, especially to Brown Patch, Pythium and Rusts.

Desire has excellent tolerance to heat and drought. This low maintenance turfgrass is well adapted to a wide range of climatic conditions and can thrive under the most demanding conditions including full sun, partial shade and high humidity.
