

# FALCON III

TURF TALL FESCUE

**Falcon III builds on a fine tradition of Falcon and Falcon II by being one of the top varieties in the NTEP turf-type tall fescues trials. Superb overall turf quality combined with a "tougher turf", Falcon III has the characteristics desired by today's top grounds maintenance professionals.**

**Widely Adapted** - Falcon III performs well in high stress Southern and Eastern Locations, sun or shade, drought or high humidity!

**Dark Color Reduces Fertilizer Requirements** - Falcon III is one of the darkest green turf-type tall fescues available.

**Disease Resistance** -Falcon III had nearly the best resistance to brown patch, and excellent resistance to net blotch, pythium and red thread.

**Weed Resistance** -Excellent season- long density! An aggressive lateral growth habit will restrict weed encroachment.

**Faster Establishment** - Falcon III germinates quickly and has great seedling vigor.

## MEAN TURFGRASS QUALITY
