

# TURF TALL FESCUE

## SOUTHERN CHOICE II

Southern Choice II exhibits one of the best overall Turf Quality ratings available. This new Turf Type Tall Fescue has surpassed recent top rated varieties in disease resistance, turf density and dark color!

Southern Choice II is one of the darkest green Tall Fescue varieties available. With its excellent turf density, Southern Choice II will help choke out weeds, while retaining its legendary ability to thrive in hot, humid weather.

Plant in sun or shade, wherever a lower maintenance, drought tolerant turfgrass of excellent quality is required.

### GENETIC COLOR

(1999 Data)
