

# HIGH FIVE ALFALFA

- High forage yield potential
- Superior forage quality
- High resistance to *Aphanomyces* race 1 & 2
- Very fast recovery after cutting
- Excellent winterhardiness and stand persistence
- Unequaled disease and pest resistance

**HIGH FIVE** alfalfa with its unsurpassed combination of high forage yield potential, very fast recovery after cutting and superior forage quality is ideal for commercial hay growers or dairy producers using an intensive cutting management schedule for areas with longer growing seasons. High resistance to multiple races of *Aphanomyces* root rot combined with the rest of the outstanding disease and pest resistance package helps ensure long term overall agronomic performance and stand persistence. **HIGH FIVE** is adapted to all areas where fall dormancy 4 and 5 alfalfa varieties are planted.

## DISEASE / INSECT / NEMATODE RATINGS

Bacterial Wilt	Highly Resistant (HR)	5*
Fusarium Wilt	Highly Resistant (HR)	5*
Verticillium Wilt	Highly Resistant (HR)	5*
Anthracnose-Race 1	Highly Resistant (HR)	5*
Phytophthora Root Rot	Highly Resistant (HR)	5*
Aphanomyces-Race 1	Highly Resistant (HR)	5*
Aphanomyces-Race 2	Highly Resistant (HR)	5*
Wisconsin DRI	35 out of 35	
Pea Aphid	Highly Resistant (HR)	
Spotted Alfalfa Aphid	Resistant (R)	
Stem Nematode	Resistant (R)	

## ◆ Characteristics

Fall Dormancy ..... 5.0  
 Winter Survival ..... 2.0 (Very Good)  
 Root Type ..... Tap  
 Recovery After Cutting ..... Very Fast
