

PROFESSIONAL DAIRY PASTURE MIXTURE

- Excellent palatability
- High protein for maximum milk production
- Strong persistence and re-growth that withstands grazing pressure
- Excellent drought tolerance and winterhardiness

Formulated to maximize performance of dairy cattle, Professional Dairy Pasture Mixture is a specially selected blend of unique, high-quality grasses and clovers that provide a balance of exceptional yield, nutrition, stand persistence, and disease resistance. This mixture was created to meet the needs of producers who want to optimize animal performance and maximize per-acre return.

Proprietary Mix Ingredients

Tall Fescue 35%

- High yielding, endophyte-free variety
- Excellent hay and pasture variety
- Perfect for winter stockpiling
- Very good persistence and drought tolerance

Orchardgrass 35%

- Increased stand persistence
- Ideal for hay or pasture
- Excellent seedling vigor
- Great palatability

Intermediate Ryegrass 10%

- Fast establishment
- Vigorous regrowth
- Drought tolerance
- Highly nutritious

Perennial Ryegrass 10%

- Very palatable
- Good digestibility
- Easy establishment
- Handles intensive grazing

Timothy 5%

- Early maturity
- Great palatability
- Improved summer regrowth
- Excellent spring vigor
- Superior leafiness
- Very winterhardy

Alfalfa (34% Coated) 4%

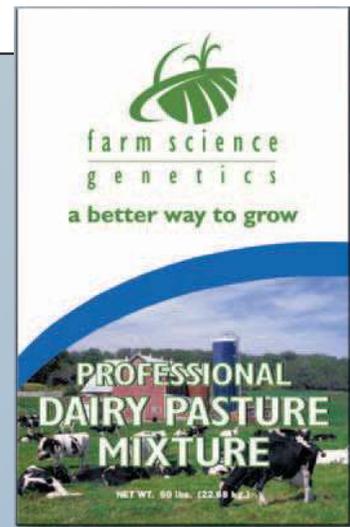

- Dual purpose alfalfa - hay or graze
- Wide, deep-set crowns
- Stands up to wheel traffic pressure
- Superior winterhardiness and persistence

Ladino White Clover (34% Coated) 1%

- High-quality feed
- Large leaf clover
- Persistent: survives intense grazing pressure

Planting Specifications

Seeding rates	20-25 pounds per acre - new seedings 15 pounds per acre - overseeding
Seeding dates	Early Spring or Fall
