

MARINER V ALFALFA

- Branch rooting system
- High resistance to Aphanomyces-Race 2
- Adapted to variable soil conditions
- Stands up to wheel traffic pressure
- High yield and quality potential
- Superior winterhardness and persistence

Mariner V alfalfa with high resistance Aphanomyces Race 2 excels on both wet and well drained soils, plus resists heaving and mechanical injury better than other alfalfas. An excellent disease and insect resistance package, including high resistance to stem nematode, ensures wide adaptability throughout the United States and Canada. With high yield and forage quality potential, Mariner V gives you the flexibility to optimize your management decisions, even under less than ideal soil conditions.
